Prof. Mukesh Kapila
University of Manchester, UK
Former Director, WHO

CHIEF GUEST

Valedictory Session

Mr. Rajendra Pratap Gupta
Advisor, Union Minister of Health
& Family Welfare

Indian Context

According to WHO's 2015 report giving world health statistics, India, at \$58 has one of the lowest per capita health care expenditure compared to U.S. (\$ 8,895), China (\$ 322), and even Indonesia (\$ 108). The doctor-patient ratio is among the lowest with a mere 0.5 doctors for every 1000 people in large parts of the India against the WHO recommendation of 1 doctor for every 1000 people.

India's healthcare delivery mechanism is beset with shortcomings; over 75 % of the population has no health insurance; there is a shortage of two million hospital beds compared with the global standard of 2.5 beds per 1000 people.

Healthcare Delivery System

Healthcare faces daunting challenges globally. The supply of healthcare services is constrained by the inadequacy of service models, limits in workforce capacity, and the need for capital investments in critical infrastructure. Simultaneously, demand is shifting from communicable to non-communicable diseases.

Hospitals and healthcare systems are striving to achieve the Triple Aim – improving the patient experience of care, improving the health of populations, and reducing the per capita cost of healthcare. The key considerations for an effective healthcare delivery system are access, affordability, and quality. To achieve these goals, hospital leaders are designing new healthcare delivery models.

The healthcare sector is undergoing rapid, momentous change. The combination of ongoing technological development and far-reaching regulatory changes dictate that no business model can survive without constant revision and rejuvenation. Hospitals, insurers, pharmaceutical companies, investors, start-ups and other organizations all need to compete in a uniquely complex and fast-evolving strategic space. To lead in healthcare, to launch something new, to create value for the stakeholders, we need a fundamental understanding of markets and organizations combined with deep insight into healthcare challenges.

The Objective of the Conference

To Know, Share and Implement best Healthcare delivery models from around the world and evolve adequate management options for the hospitals and healthcare providers of the future.

The Sub-themes

Day 1-March 8	
9.00 – 10.00 am	Registration

Partners for the Event

About XIME

Xavier Institute of Management & Entrepreneurship (XIME), Bangalore was established in 1991 by a group of distinguished academicians under the leadership of Prof. J. Philip, former Director of IIM-Bangalore. Today it is a leading B-School rated among the top 30 B-Schools in India. XIME's flagship programme is its two-year full time programme leading to Post-Graduate Diploma in Management (PGDM).

XIME has collaborative agreements with many foreign universities through which student exchanges are encouraged. The Institute is a proud recipient of Indian Accreditation from NBA (National Board of Accreditation) and international accreditation by the Accreditation Council for Business Schools and Programs (ACBSP), USA.

About AHPI

Association of Healthcare Providers (India) represents the majority of healthcare providers in India. It works as "not for profit" organization and advocates with the government, regulatory bodies and other stake holders on issues, which have bearing on enabling its member organizations to deliver appropriate healthcare services to community at large. The association functions through an empowered secretariat which facilitates the member organizations in improving their systems, processes and outcomes on continuous basis, in line with the vision, mission and objectives of the association.
