

#beclosetocare

Official Telemedicine Partner

Healthcare comes home, to you.

Enabling you to **manage your health better** through connected care

Redefining Convenience

This is a time where convenience matters more than ever. And the definition of convenience is being rewritten every day, as all the industries embrace digitalisation. Patient experience is a combination of convenience, access, and choice.

Connect with a doctor, therapist, or medical expert anywhere you are by

Video Call

Phone Call

Text Chat

“ 51% of consumers rate **convenience and access to care** as the most important factors in their decision-making, when it comes to healthcare. ”
- NRC Health's Market Insights Survey

Uncompromising Security

Digital security is not a result, but a process - it is this understanding that keeps us secure, but at the same time, alert. Our continuous research and development of data security threats, protocols, and technologies mean, 100% security and privacy of sensitive patient information, at both ends. Strict privacy policy and state of the art data center facilities that meets data residency laws, security is embedded in our system to ensure that users can choose what sensitive data to share, and with whom, without any worries.

HTTPS
(End-to-end
Encryption)

Industry Standard
AES-256 Encryption
Algorithm

2048-bit
SSL
Certification

In the digital realm,
data encryption is the insurance policy.
Sharing, yes. But with care.

Privacy, Guaranteed

It is one-on-one, and we make sure that it stays that way because that's how a doctor-patient interaction should be. The information you disclose in your online medical records inherently remains private and confidential.

Certified & Compliant

The information
YOU provide is yours

What's in the box
