

Academy of Digital Health Sciences

The courses offered by the Academy of Digital Health Sciences will help you broaden your horizons and secure your organization's future and your practice. They will equip clinicians, paramedics, healthcare professionals, and healthcare managers the knowledge about deploying digital health tools.

Post-Graduate Certificate Programme & Diploma Programme in Digital Health

'Certified Digital Health Professional' (CDHP™) Course is aimed at providing knowledge on theoretical, technological, management & application aspect of digital tools across the continuum of care. The CDHP is jointly offered by the leading institutions across Digital Health and Management- Academy of Digital Health Sciences and Indian Institute of Management (IIM) Raipur.

The Academy of Digital Health Sciences, in collaboration with the Indian Institute of Management-Raipur, has done thorough grounds up research to identify the growth gaps and the necessary focus areas needed to inspire, innovate and execute growth and profitability of the hospital segment in India. The ground – breaking learning content design is an outcome of this in-depth study and brainstorming with successful founders and CEOs of hospitals.

Executive Leadership Programme for Founders & CEOs: Micro, Small & Medium Hospitals
